

# FreecallTV Set Top Box

---

Model No: FreecallTV-700

---

FreecallTV 2 in 1 set top box come with a compact design. Just one box, you can make unlimited Free calls and also watch your regional and international TV channels and movies.

Not only for Watching TV, It is also an device that allow you to use an existing Cordless / DECT phone or any kind of traditional home phones to make either unlimited free calls through internet or make call through an usual landline. It means that a local phone line and the internet cable from a router can be linked up together to your home phone at a time. Then, the Home Phone is available ready to call to any 45 countries through this FreecallTV Box through the dedicated Freecall network. You will also receive calls from landline as usual or other FREECALL-member to you from all over the world. You home-phone will remain all services what the local telecom is providing.

Of course a great benefit from this FreecallTV box is allow user to make calls for oversea or domestic that are totally free after you already become a Freecall member..

## Connections and Operation

1. The operation light will be Blue. It will be RED while in standby mode. See Fig.1
2. The Remote set must be required to point to the remote sensor while you want to control the box.

3. Connect TV to this box through HDMI or AV port depend on your TV set interface. HDMI is mostly recommended
4. If you have a Cat5 internet cable from

router, plug it to the RJ-45 port. See Fig.2 If you are ready to connect to wifi, just leave this port is empty.

5. Suppose you have joined Freecall member to get unlimited Freecall service, plug your homophone to the Phone jack. Plug the usual landline to the Line jack. If you have no a traditional phone line, just remain Line jack to be empty.
6. Plug the Power adaptor to Power port. Since power is ON for both TV set and Set top box, the operation light is in blue and a start up Logo will be displaying.
7. Install 2 pcs AAA batteries (Not included in factory packing) into the remote set compartment. See Fig.3 While you pressing any key, you

Fig.3

will observe the Remote Sending /Bat.Check light will be blinking to proof if your remote is in good condition. Be sure IR transmitter will point to the remote sensor on the main unit while operation within 10 meters.

8. Set up for Connecting with Cat-5 Cable (Ethernet 10/100M)

Factory default is already set for Ethernet 10/100M connection. It is highly recommended because it will be working more reliable and faster than a WiFi connection for TV data streaming. If you want to know your current connection, just click the Set up icon on the right corner of Home screen as Fig. 4

Fig.4

9. Set up for Connecting with WiFi

if you will not expect to make Freecall and will watch TV only, and you are sure a WiFi signal will be strong for the box reception, a simple connection should be a wifi. You need to change the default for a WiFi mode by following steps as Fig.5

Fig.5 Press OK to bring out key board

You can enter numeric through the key pad on the remote directly. Simply to press OK to bring out the Key board on screen for inputting letters.

Press BACK to hide Keyboard

## How to Make Freecall

In order to get unlimited Free credits to make free calls, you are required to subscribe for a Freecall membership firstly. After you will be informed a membership isto be validated, you can enjoy unlimited free calling to over 45 countries where are within Freecall standard zone. To find where you able to reach, check the calling coverage here:

[www.freecallnet.com/country\\_list.html](http://www.freecallnet.com/country_list.html)

To make your calls going through, you have to follow the Freecall dialing rule to send a call out: Always dial with 900 +country code +phone No. # For an example you want to call USA: Dial 900 1 xxxxxxxxx # . (# key will reduce 3~5 seconds for getting rings back)

## How to Make Traditional Calls by Landline

Pick up handset and press 00 for a traditional dialing tone from an original landline, then, you can make calls through your traditional landline as usual. You can perform all phone features which the local telephone provider is offering to you.

## How to Incoming Calls

Your phone will always stand by to receive any calls incoming from either traditional landline or other Freecall member
